She knew the problem as she is a ward member of that area where crusher was installed. During blasting the flying stones and chips were falling close to their houses. Due to mining activities and running of stone crusher round the clock, huge quantity of dust was generated which was falling on their foodstuffs and drinking water. No measures were taken to resolve their issues. She gave a written memorandum to the administration during the public hearing process which she read out over there and requested to fulfill their demands so that everybody will be ever grateful. If their demands are fulfilled, she has no objection for starting the stone quarry. The grievances are as follows:

- Requested to provide employment to the locals.
- Monthly rent to be paid to the people who are residing adjacent to the leasehold area through mutual understanding and consent.
- Due to blasting their house have damaged. There are possibilities of loss of lives of their cattle while they are at nearby jungle for grazing. There is threat to the lives of the human being for which they are very much scared. Hence, she requested not to give permission for blasting.
- She requested to provide 5 Nos. of bore well as ground water level of that area has depleted considerably.
- She alleged that the previous lessee excavated the stone quarry beyond the permissible limit and did not fill the mined out area. As a result, huge quantity of water is deposited in the pit and 60% of their area has become completely submerged. So she requested to drain out the deposited water and fill the pit and respite them from this trouble.

SI No.	Issues raised	Response of Project Proponent
Envir	onmental Issues:	
	Adverse impact on nearby houses due to blasting.	There is no human settlement or house within five hundred meters (500 meters) radius of the proposed Ambadahara sione quarry. Controlled explosions will be practiced by making small holes to avoid damage due to explosions. So there is no possibility of any damage to the house.
2.	Dust misance in surroundings affecting public due to quarrying activities and transportation.	Wet drilling will be practiced. Regular sprinkling of water will be done to avoid dust and plenty of trees will be planted around the area.
3.	Depletion of ground water leading to water scarcity.	Proposed quarrying activities of Ambadahara stone quarry will not intersect the ground water table. There is least chance of impact on ground water regime.
4.	Dewatering of mine pit & reclamation.	The quarrying activity will not intersect the ground table. So, there is no chance of dewatering. However, the accumulated rain water will be pumped out and utilized for dust suppression and water sprinkling purpose in and outside the lease area.
5.	Operation of stone quarry as per the Govt. norms.	Operation of stone quarry will be carried out as per the Govt. norms.
Perio	heral Issues:	
1.	Employment of locals for livelihood.	Local people as far as possible shall be employed as per their qualification and experience.
2.	Compensation for their damage of agricultural land, houses due to quarrying activities.	The proposed quarrying will be carried out within the limits prescribed by the government, so that there is no risk of affecting any building or agricultural area. If the land is affected then remedial measures or compensation will be given as per the advice of representatives of local people and local administration.
3.	Provision of five nos. of bore wells to meet their water demand.	Five nos, of bore wells will be done to meet water demand of the area.
